Hashtrust Technologies

Where Engineering Meets Trust. And Innovation Delivers Impact.
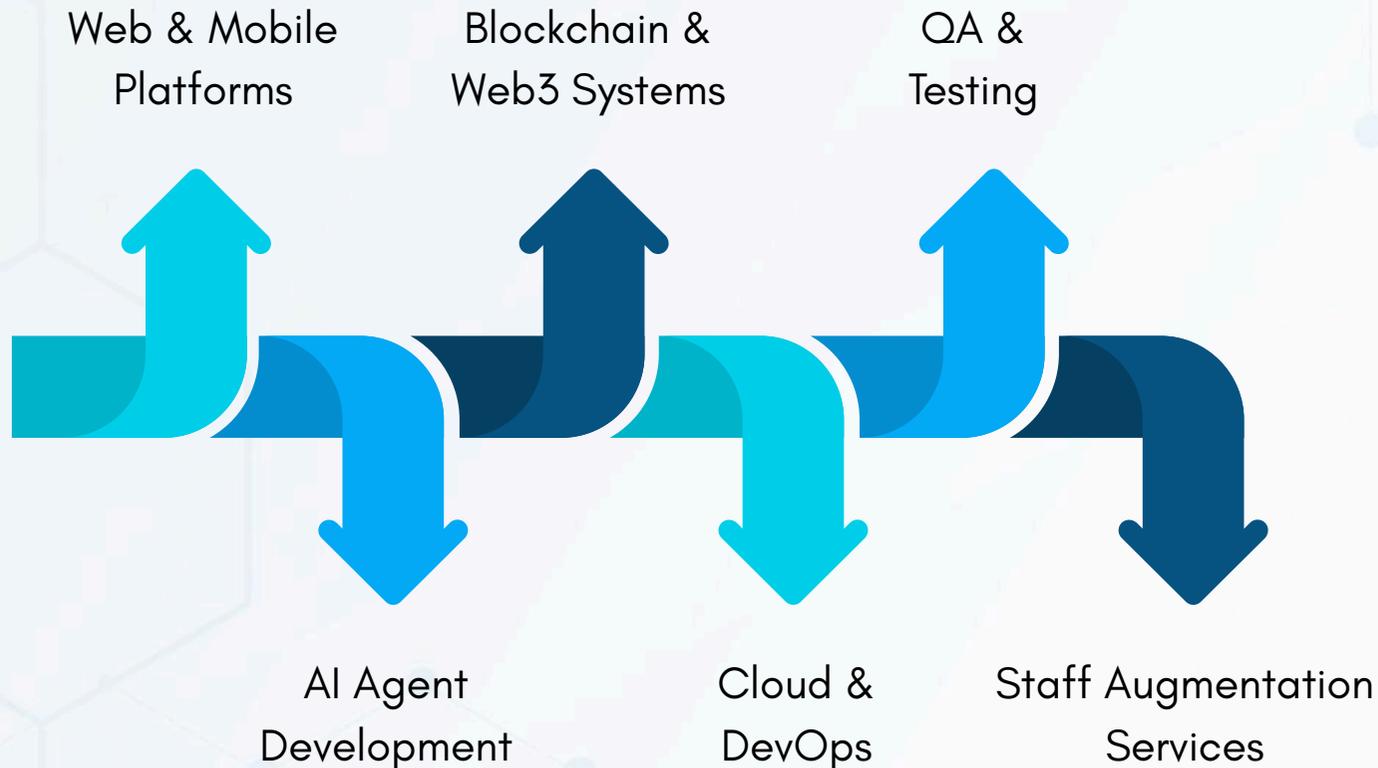

About Hashtrust.

Hashtrust Technologies is a full-cycle software product development and digital innovation company. Founded in 2021 by a group of engineers passionate about building clean, scalable systems, we've grown into a 50+ member team delivering solutions to clients across India, the United States, Europe, and the UAE.

We specialize in delivering production-grade, future-ready digital solutions across:

Web & Mobile
Platforms

Blockchain &
Web3 Systems

QA &
Testing

AI Agent
Development

Cloud &
DevOps

Staff Augmentation
Services

🎯 Our Mission

To empower businesses with innovative, scalable, and intelligent software solutions that deliver measurable value, solve real-world problems, and position our clients as digital leaders.

👁 Our Vision

To become the most trusted technology partner globally — known for building meaningful digital products, solving complex challenges, and enabling business transformation through innovation.

Excellence

Client's Success

Integrity

CORE VALUES

Going above and beyond for clients' progress

Upholding honesty and transparency

Services.

At Hashtrust, we design and build intelligent, scalable, and secure digital products — combining the best of full-stack development, AI, and blockchain technologies.

1. Full-Stack Web & App Development

We design and develop modern, fast, and scalable apps for web and mobile:
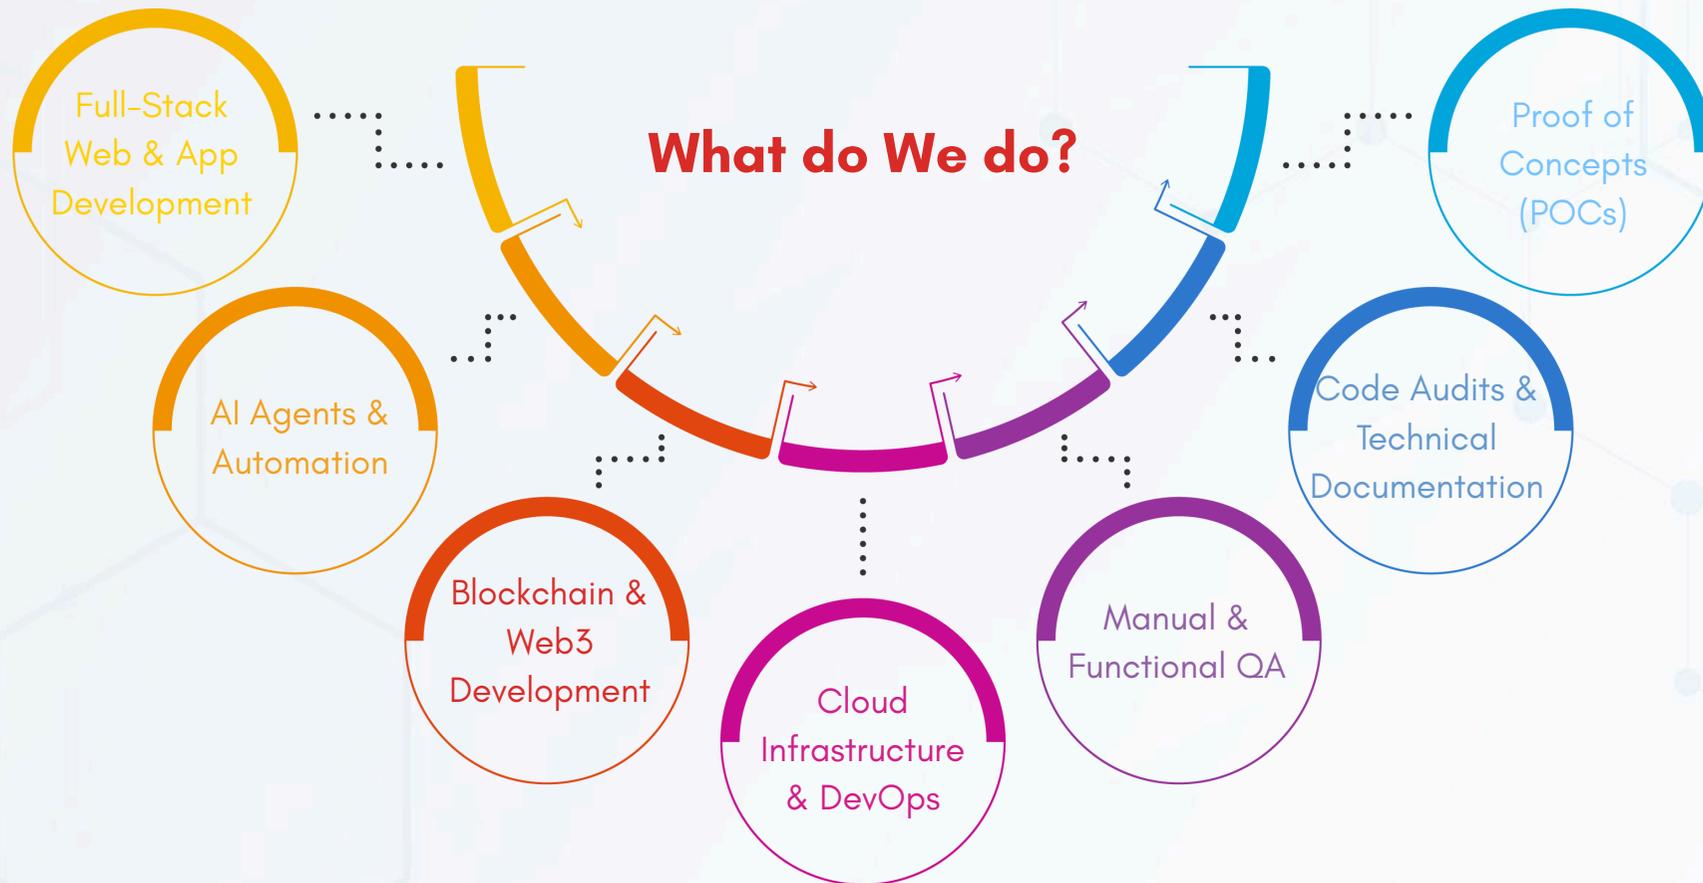

- Frontend: React.js, Next.js, Tailwind CSS.
- Backend: Python (Django, FastAPI), Node.js.
- Mobile: Flutter, React Native.
- DevOps & CI/CD: Docker, GitHub Actions, Vercel, Render, AWS, GCP.

2. AI Agents & Automation

We build intelligent agents that automate tasks, interact autonomously, and deliver personalized experiences. Use cases include:

- Trading bots & payment agents.
- Virtual assistants for business workflows.
- LLM-powered multi-agent systems.

Services.

What do We do?

Full-Stack Web & App Development

AI Agents & Automation

Blockchain & Web3 Development

Cloud Infrastructure & DevOps

Manual & Functional QA

Code Audits & Technical Documentation

Proof of Concepts (POCs)

Services.

3. Blockchain & Web3 Development

From idea to mainnet — we offer complete blockchain development:
- Smart contracts using Solidity (Ethereum, Polygon, BNB).
- Tokenization & NFT projects.
- Cross-chain integration & DeFi logic.
- Wallet connectivity, transaction handling, and on-chain/off-chain logic.

4. Cloud Infrastructure & DevOps

We help teams scale reliably with cloud-native architectures:
- Infrastructure setup on AWS and GCP.
- Serverless deployments, Docker, Kubernetes.
- CI/CD pipelines, environment configs, monitoring & logging.

Services.

5. Manual & Functional QA

Quality isn't optional — it's built into our process:

- Detailed test plans & real-device testing.
- Functional, regression, UI/UX testing.
- Bug reports with priority-based triaging.
- Performance & stress testing on request.

6. Code Audits & Technical Documentation

We ensure your product is production-grade and developer-friendly:

- End-to-end code reviews and audits to find bugs, security flaws, and performance bottlenecks.
- Clean, up-to-date technical documentation (API docs, system architecture, onboarding guides).
- Developer handover kits for internal or third-party teams.

7. Proof of Concepts (POCs)

We turn early ideas into working prototypes fast — usually in 2-6 weeks:

- Validate feasibility.
- Attract investors or internal buy-in.
- De-risk full product development.

Tech Stack.

Frontend

- React.js
- Next.js
- Vue.js
- Tailwind CSS / Bootstrap
- Redux / React Query
- Jest
- Cypress

Backend

- Python (Django, FastAPI, Flask)
- Node.js (Express.js, NestJS)
- REST APIs / GraphQL
- OAuth2 / JWT
- Celery / RQ
- PyTest

Blockchain & Web3

- Solidity
- Ethereum / Polygon / BNB Chain / Solana / Cosmos SDK
- Hardhat / Foundry / Truffle
- Wallets: MetaMask / WalletConnect
- Storage: IPFS
- Cross-chain: LayerZero / Axelar / IBC
- Indexing: The Graph / SubQuery

AI, GenAI, and Multi-Agent System

- OpenAI API / Anthropic Claude
- LangChain / Transformers (HuggingFace)
- Multi-agent orchestration: Autogen / CrewAI / LangGraph
- Vector DBs: Pinecone / Weaviate / FAISS / Chroma
- Prompt tools: LangSmith / LlamaIndex

Tech Stack.

Cloud Infrastructure & DevOps

- Cloud: AWS / GCP
- Containers: Docker / Kubernetes / Helm
- CI/CD: GitHub Actions / GitLab CI
- Infra as Code: Terraform
- Deployment: Vercel / Render / Netlify
- Monitoring: Prometheus / Grafana / ELK / Sentry

QA, Testing & Audits

- Selenium
- TestRail
- Postman

Documentation & Dev Tools

- Swagger / OpenAPI
- Docusaurus

Mobile Development

- Flutter
- React Native
- Firebase

**Looking for a specific stack? Our engineers adapt quickly.
Just ask. Schedule a call**

Flexible Engagement Options.

We offer flexible pricing models tailored to your needs — whether you need full-time developers, project-based delivery, or quick MVP support.

Role	Monthly Rate (USD)	Hourly Rate (USD)
Junior Developer	$2000+	$12-15/hr
Mid-level Developer	$2,800+	$15-25/hr
Senior Developer	$3,100+	$25-40/hr

- Custom quotes available based on project scope, tech stack, and timelines.
- All developers are pre-vetted and ready to onboard within 3-7 days.
- Team extensions, part-time, and sprint-based billing also available.

Our Foundation: What We Believe in.

Engineer-Led Execution

Experienced software engineers lead every project. No handoffs to account managers. Our tech leads are involved from day one.

Product Thinking at the Core

We don't just build what you ask for — we refine your idea, challenge assumptions, and deliver functionality that works in the real world.

Transparent Communication

Clear documentation, proactive updates, and real-time reporting. No vague timelines or guesswork.

Built for Longevity

Our codebases are modular, testable, and scalable — designed to adapt and evolve with your business.
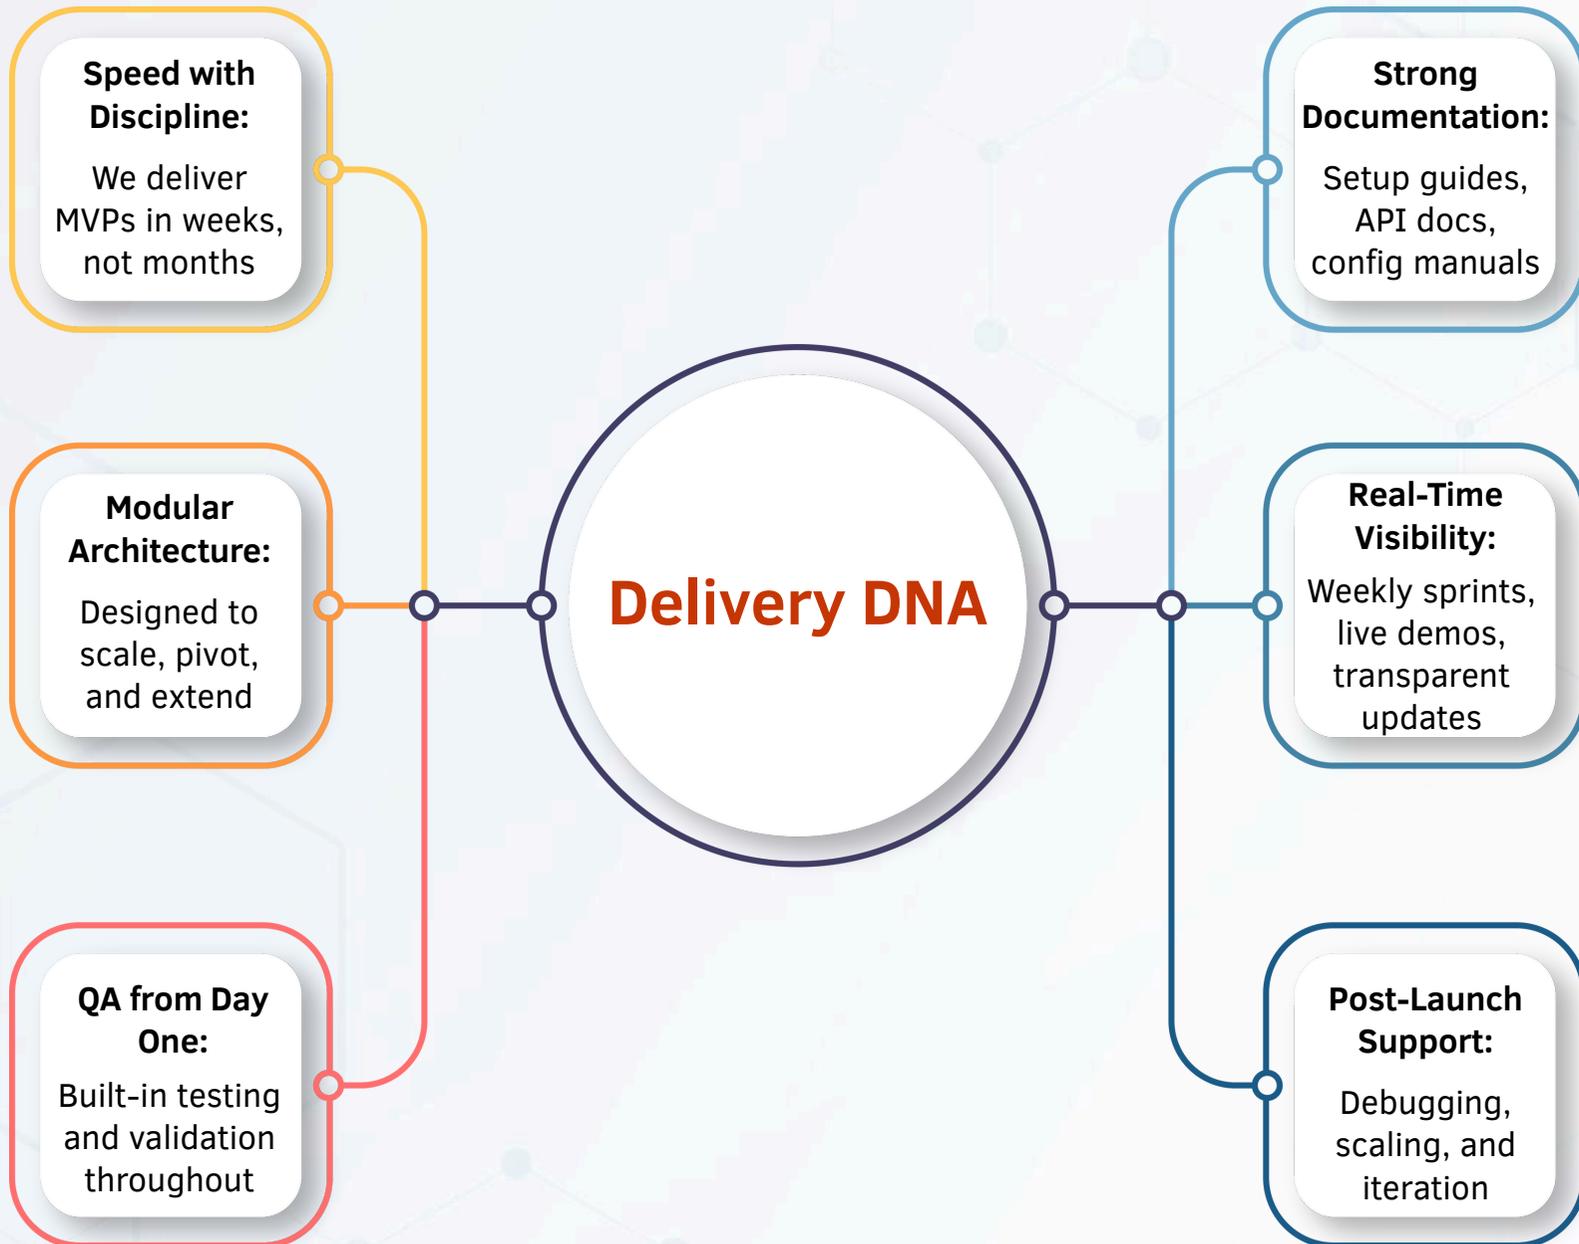

Innovation Through Experimentation

We dedicate time to internal R&D, open-source projects, and emerging technologies — keeping your product ahead of the curve.

Our Delivery DNA.

Delivery DNA

Speed with Discipline:
We deliver MVPs in weeks, not months

Modular Architecture:
Designed to scale, pivot, and extend

QA from Day One:
Built-in testing and validation throughout

Strong Documentation:
Setup guides, API docs, config manuals

Real-Time Visibility:
Weekly sprints, live demos, transparent updates

Post-Launch Support:
Debugging, scaling, and iteration

Agile. Transparent. Accountable.

Communication:
Slack, Discord, MS Teams

QA Tracking:
TestRail, ClickUp, Google Sheets

Documentation:
Notion, Google Workspace, Confluence

Project Management:
Jira, Linear, Trello, Notion

Delivery Rhythm:
Daily standups or weekly syncs — your call

We work seamlessly with your systems

Delivered a full-featured AI Agent MVP (chat + memory + payments) within 4 weeks.

Designed tokenomics and smart contracts for a Web3 product.

Embedded a 3-member team into a UK startup in just 7 days.

Why Clients Stay With Us.
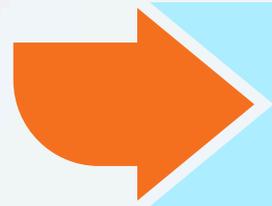

"Hashtrust felt like an extension of our team — not just vendors."

"We gave them an idea. They gave us a running product."

"They don't just deliver code. They deliver outcomes."

Build With Us If You.

Need a production-ready MVP in less than 6 weeks.

Want a flexible team extension that adapts to your product roadmap

Are exploring GenAI, blockchain, or agent-based automation

Care about clean code, clarity, and long-term ownership

Want to go beyond the obvious and build something remarkable

Our Track Record.

40+ full-stack web apps deployed

90%+ bugs caught pre-release across all major builds

15+ GenAI agent systems running in production

10+ Web3 solutions deployed

25+ MVPs completed in <6 weeks

20+ developers deployed under staff augmentation

20+ mobile apps delivered

Let's Build Together.

Have an idea in mind?

Do you need help scoping your product, exploring GenAI or Web3 solutions, or hiring on-demand remote developers?

Book a free 15-minute discovery call with our expert team. **Schedule a call**

We'll walk you through our approach and show you how we can turn your vision into a powerful, production-ready product.
